

Nestled in a quiet and beautiful bay on Sydney's Harbour, this project involved a significant refurbishment of a large Federation House in a conservation area, that transformed into an elegant and sophisticated family home. Externally, a new entrance was created and at the back a covered terrace was added to take advantage of the extensive Harbour views. The gardens were extensively remodelled and include a new swimming pool. Internally, a new staircase makes a strong and stunning architectural statement, connecting the three levels of the house and providing a link to the lower floor and back gardens. The exquisite interior design palette, designed in collaboration with Interior Designers Hare + Klein, is highly detailed and textural, consisting of luxe finishes, lighting and unique furniture which reflect the client's heritage and extensive travels.
