

Purchased with an existing DA for an elevator, the new owners commissioned us to install a staircase instead to connect all 4 levels of this home without compromising the views enjoyed over Middle Harbour. Extra space was excavated in the basement level to create a guest bedroom with ensuite, a mudroom, a storage room and a state-of-the-art wine cellar. An existing rumpus room was enlarged and upstairs, a new master room with ensuite and WIR were also added. The finishes throughout the house were updated, bespoke furniture & art selections added to complement the house as well as the client's lifestyle. The design delivers a contemporary and light home, functional for today's lifestyle.
