BURRAN AVENUE HOUSE | MOSMAN

2016

Set on a battle-axe block above Balmoral Beach adjacent to a nature reserve, this three-level house is designed to enjoy the breathtaking water views from every level. The entry on the middle level welcomes one with its light filled double height volume and a striking off-form concrete wall with a timber clad cantilevered stair. The living space beyond, with its centrepiece of beautifully crafted marble kitchen island, is large and expansive yet articulated to provide intimate spaces and framing the panoramic water view.
